

Dementia

Coordinator Service

Many people living with Dementia feel that having support along their journey will maximise independent living and prevent a crisis.

The Dementia Coordinator Service, delivered by Help & Care, is committed to supporting people to live well with Dementia.

The service is available to everyone across Dorset, age 18 and over including support for immediate carers and loved ones.

A referral to a Dementia Coordinator is made by the Memory Assessment Service at Dorset Healthcare – once a diagnosis has been confirmed. However, we accept self-referrals, referrals from GPs and other stakeholders as long as a diagnosis of Dementia is confirmed.

Our support and advice includes:

- Information relating to the diagnosis and its prognosis.
- Coping with memory loss.
- Benefits entitlement and how to claim.
- Information on care options and how to access these.
- Liaising with agencies, groups, clubs and other community based support resources on behalf of the service user, if required.
- Advice and guidance for a carer or family.
- Information on driving with dementia and legal requirements.
- Referral to Age UK for Cognitive Stimulation Therapy if applicable.
- A dedicated Early Onset Dementia Coordinator for those diagnosed aged 65 and under.

This list is not exhaustive, but does highlight the expertise, experience, and knowledge available. Our service is non-clinical, so any questions relating to clinical issues or medication should be addressed to the relevant GP.
